OBJECTIVE

Front end developer with 5+ years of experience in building intuitive, high performance web applications. Strong in analytical problem-solving SPA development, and modern JavaScript frameworks. Seeking a challenging role to leverage my expertise in a dynamic team to enhance responsive user experience through clean, scalable front end engineering. .

SKILLS

Languages: HTML5, CSS3, JavaScript (EcmaScript 6+), Typescript, Razor HTML.

Front-End Frameworks: React.js, Redux, Zustand, Lit, Next.js, Next auth.

JavaScript Library/Package: Yup, Formik (form validator), FormBuilder, jQuery, data tables, select2, chart.

CSS: Bootstrap, Material UI, Responsive Design, SASS.

Testing: QUnit, Jest, TestNG, Selenium, Unit Testing, SOAP, WSDL.

Back-End: ASP.net, Node.js, Express, MySQL, JSON/REST Api, GO, Postman.

SDLC: JIRA, Slack, VS Code, MS teams, Scrum, Trello, Figma, Git, BitBucket, Confluence.

EXPERIENCE

NRT Technology Corp. Toronto, ON — *Front end Developer.*

APRIL 2025 - PRESENT

- Developed and maintained complex Single Page Application (SPA) interfaces using vanilla JavaScript, improving the usability and performance of NRT's mobile console used by internal teams and enterprise customers.
- Built internal automation scripts to improve code quality, avoid repetition, and enforce consistency across the codebase.
- Designed and implemented comprehensive QUnit test cases to validate UI behavior, catch regression early and increase confidence in weekly production releases.

ShareVision. Vancouver, BC — *Developer.*

NOVEMBER 2024 - SEPTEMBER 2025

- Created front end features using Razor HTML in the .NET framework to deliver dynamic and responsive user interfaces.
- Implemented a custom form builder that allows clients to create and modify forms without developer intervention, enhancing user autonomy and reducing support requests.
- Collaborated with backend developers to integrate client driven forms with server-side logic, ensuring seamless data validation and storage.

ZeMind Gaming Studio. Toronto, ON — *Front end Developer.*

MAY 2021 - NOV 2024

- Constructed CMS for game apps to control game data/assets and integrated RESTful APIs for CRUD operation.
- Participated in daily stand-up meetings and reporting potential roadblocks as part of Agile/Scrum practices.
- Worked globally distributed team members using BitBucket and GitHub as version control systems throughout the SW development lifecycle.
- Developed interactive web components and custom animations and 3D environments to enhance user engagement.
- Projects: [VW](#), [Hulu](#), [USGA](#), [Google Chromebook](#), [GooseEyes](#), [Biom](#)

Ontario Public Services. Toronto, ON — *Application Programmer Analyst*

JULY 2016 - DECEMBER 2018

- Tested application design, functionality and navigational flow while working with the policy analysts & developers.
- Prepared automation test scripts in UFT, test cases and test plans for functional modules per business requirements.
- Performed smoke, functional/end-to-end, regression, integration, accessibility and User Acceptance Testing(UAT) during various phases of the application.

TIO Networks. Vancouver, BC — *QA Analyst*

FEBRUARY 2014 - FEBRUARY 2015

- Assisted in the design and execution of test cases, Performed manual testing on web and mobile applications to identify defects.
- Created SQL queries for backend testing to ensure data integrity for all environments. .

EDUCATION

BrainStation. Toronto, ON — *Diploma in Web Development*

University of Toronto. Toronto, ON — *M.Engg in Electrical and Computer Engineering*

Bangladesh University of Engineering and Technology. Bangladesh—*B.Sc Engg in Electrical & Electronic Engg.*
